## ANALYSIS / SHELF LIFE CERTIFICATE

<i>Description of product:</i>	Hop pellets Type 90 <b>STYRIAN SAVINJSKI GOLDING</b>
<i>Batch No. / LOT No.:</i>	<b>HPP 1024-01</b>
<i>Crop Year:</i>	<b>2021</b>
<i>Alpha acid:</i>	<b>** % ASBC SPECTRO</b>
<i>Alpha acid:</i>	<b>3,1 % EBC 7.5</b>
<i>Moisture:</i>	<b>8,3 % EBC 7.2</b>
<i>Hop Storage Index (HSI):</i>	<b>0,34 EBC 7.13</b>
<i>Essential Oil Content:</i>	<b>0,72 ml/100g EBC 7.10</b>
<i>Production Date:</i>	<b>NOVEMBER 2021</b>
<i>Best before Date:</i>	<b>NOVEMBER 2024</b>
<i>Country of Origin:</i>	<b>SLOVENIA</b>
<i>Shelf Life:</i>	<b>3 YEARS</b>

“Was manufactured in accordance with both the legislation in force in Europe (Slovenia) and the specifications of this firm. We declare that we are authorized to manufacture process, sell this product, which is freely sold in our country, (global countries), and therefore adapt for human consumption. We also declare that our facilities satisfy the standard hygiene requirements of our Health Authorities and that this merchandise does not contain any toxic substances that many provoke side effects.

Hop products are produced from a naturally grown material, which is liable to variable rates of deterioration after harvest. Although processing of raw hops into hop products and packing in a protective atmosphere helps preserve the important constituents of the hops, it is essential that hop products are:

- Stored correctly in a cold and dark space on 0 – 5°C
- Used immediately upon opening
- Used within the recommended “best before date” to guarantee the best result

Hop products, which were stored in recommended conditions and are past the “best before date” may still be suitable for use, but might provide a slightly altered brewing value.”
